## Vol. 9, No.1, 2018

**W**E are pleased to present the ninth volume of the ULAB's Journal of Science and Engineering (JSE). It's been another successful year for us. Since 2010, ULAB's JSE has maintained its position as the most prestigious national publication in the field of science and engineering.

In the first volume, we found many ordinary papers were being submitted, but the quality of submitted paper is gradually improving in the subsequent volumes. Based on peer-review, this year we have accepted 4 papers.

The first paper describes an implementation of a contextual privacy-aware framework for CP-PDS which exploits contextual information with a view to build a learning classifier for prediction of user privacy preferences under various contexts.

The second paper focuses on the mechanism of possible binding sites for CO<sub>2</sub> absorption process in ionic liquids, such as monomer and dimer.

The third paper presents a statistical analysis to identify the factors those affect market share prices in the capital market of a country.

Finally, the fourth paper shows a numerical comparison of two standard finite difference schemes such as explicit finite difference scheme with forward time backward space and centered space (FTBSCS) and forward time centered space (FTCS) for solving modified advection diffusion equation.

According to the publication policy, all papers submitted to this journal have been subject to a rigorous peer-review. We continuously strive to publish original research that contains elements with technical novelty in a timely manner. The journal's focus is on traditional areas of both theoretical and practical applications of physics, mathematics, statistics, environmental science, electronics, computer science, information and communication engineering. In addition, we shall gladly accept submissions on emerging technologies and other emerging areas related to the above fields.

You are most welcome to read this issue of the ULAB Journal of Science and Engineering. To continue publishing a high-quality journal, JSE's editorial board seeks excellent contributions containing original research or reviews.

We would like to extend our heartfelt thanks to every author, reviewer and reader for your support and dedication to JSE. We strongly believe that together, we shall elevate the journal to even higher levels of quality, impact, and reputation.

Mohammad Shorif Uddin  
Editor-in-Chief
